	Urgent	Not Urgent
Important	**DO – Your MVP** ● Add a person with their name, location, and time zone ● Calculate and display each person's local time ● Show people as pins on a simple world map ● Change each pin to green or red depending on whether it is a good time to call	**SCHEDULE – For V2.0+** ● Find the best time for a group call ● Add birthdays and important dates ● Add reminders for when someone becomes available ● Add more detailed contact preferences or availability hours
Not Important	**DELEGATE – Use Existing Tools/Libraries** ● Use Java's built-in java.time library for time zones ● Use an existing map/GUI library instead of drawing the whole map system from scratch ● Use Java file handling to save contact information ● Use built-in input tools rather than creating your own input system	**DELETE – Cut It** ● Built-in video calling ● Messaging inside the app ● Live GPS tracking
